Jayan, Chapman
Director
Gold City Games
1234 Rd.
City, n41 j12

Dear Mr. Jayan,

I am writing to express my interest in the open position for games programmer – placement/summer internship.

I am still studding at the university of Portsmouth for Computer games technology, by I would love a placement during my third sandwich year, to work for the company whilst also gain experience to continuing learning and growing. I'm not the strongest with C++ but I am constantly learning and evolving with it to try and improve and challenge myself to become more confidant coding with C++.

I have been self-thought for many things throughout my life and continue to enjoy learning new software and code languages to grow my knowledge.

I possess excellent communication skills, being well spoken with good writing skills, able to work within a team or individual environment efficiently. I have worked in many different team projects with excellent quality and outcomes. I am also experience in using engine software's like Unity and Unreal engine 4, with a decent understanding of C# and its uses in Unity.

My CV is contained within this Email and is also available on my portfolio website: https://georgekruger.github.io/

Please feel free to contract me through Email or phone. I look forward to hearing back from you.

Sincerely,

George
